

# R-Zilla AQUATIC REPTILE WATER CONDITIONER

## INSTRUCTIONS

1. Remove Water Measurement Guide and apply to tank. **(1.0)**
2. Use the guide on this bottle to determine how many gallons of water are in the terrarium.
3. Treat tap water before adding it to the terrarium.
4. Using bottle cap, measure and add 10mL of Water Conditioner to 10 gallons of tap water.

## WATER MEASUREMENT GUIDE DIRECTIONS

1. Apply guide to terrarium. Align bottom of guide to the top of base frame on tank. **(2.0)**
2. Locate the dimensions of your terrarium on the label. In the same column as your terrarium's size, match the water level to the number. **(3.0)**

1.0

Removable Water Measurement Guide determines how many gallons of water are in the terrarium

WATER MEASUREMENT GUIDE DETERMINES GALLONS OF WATER IN TANK (REMOVE LABEL FOR DIRECTIONS)				
20" L X 10" W	24" L X 12" W	30" L X 12" W	36" L X 13" W	36" L X 18" W
3	4	5	6	
2	3	4	5	6
	2	3	3	5
1		2	2	4

Align bottom of guide at the top of base frame on tank

This number is approximately the gallons of water in the terrarium.
